### GT2 AF Silicone Antifoam

GT 2AF is a compound based on a dimethylpolysiloxane oil. It is recommended for use in various types of media in every industry where foam is a problem.

GT 2AF is readily dispersed in Aliphatic, Aromatic, and Chlorinated Hydrocarbons.

#### Typical Properties:

Chemical Description: Compound based in dimethylpolysiloxane.

Active %: 100

Color: Translucent

Specific Gravity: 1.0 (Approximately)

Flash Point: 500°F min.

#### Packaging:

GT 2AF is available in 400 pound 55 gallon drums or 40 pound 5 gallon pails.
